

# Build your Brand with Private Label SSL Certificate Services

Comodo's Powered SSL programme is the World's first and only turnkey SSL re-seller solution that enables organizations to OEM Comodo's highly successful range of SSL certificates and Trust Logos ([www.trustlogo.com](http://www.trustlogo.com)).

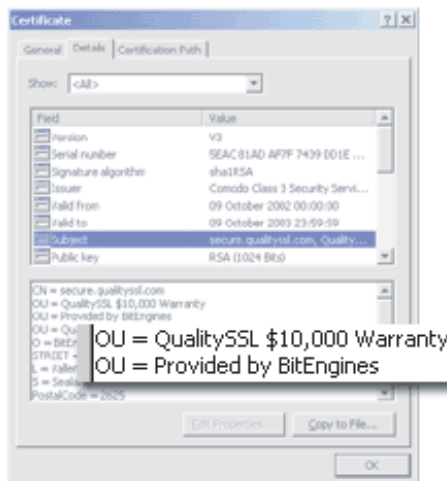

Powered SSL represents a unique opportunity for your organization to offer your own range of highly trusted SSL Certificates, strengthening your brand, widening your product portfolio and maximizing your revenues.

## Fully Control Your Own SSL Certificate Offering

Powered SSL allows you to create and control your own certificate profiles, price points and pass on all of the industry-leading features of Comodo SSL certificates including all certificate warranties offered by Comodo (up to 1mil USD); all from your own fully branded store front. With full API support for seamless integration, Registration Authority (RA) licensing and advanced reseller management systems, Powered SSL partners are fully in control.

### Your Brand is displayed:

- During the application and issuance process
- As the product type within the SSL Certificate

## Highlights

- **128/256 bit encryption strength.**
- **Industry standard x.509 Certificates.**
- **The widest portfolio of SSL certificates available including Wildcards, Extended Validation (EV) SSL and UC Certificates.**
- **Fast issuance**
- **99.3% browser ubiquity**
- **Differing warranty levels available (up to \$1million)**
- **Multi-year certificates**

## The Enterprise Opportunity

Powered SSL also allows you to provide Enterprise management Consoles (EPKI Manager) to organizations with multiple certificate requirements. The EPKI Manager allows organizations to manage and administer their certificate requirements through an easy to use web-based console and avoids the inefficiency and expense usually associated with managing multiple certificates.

# 7 Reasons to Become a Powered SSL Partner

## 1 ▶ Private white labeling of 128/256 bit encryption 1024 bit SSL certificates

## 2 ▶ Fully Managed System

Comodo operates the backend Certification Authority including high availability secure redundant server systems, high speed FIPS 140-1 Level 4 signing devices, backup and customer support. All SSL Certificates issued through the Powered SSL Service are fully supported by Comodo's industry leading customer support department.

## 3 ▶ Offer Your Own SSL Certificates Cost Effectively

No need to invest in expensive PKI hardware, software and Certification Authority expertise often associated with offering your own certificate solutions. Powered SSL allows you to use Comodo's established infrastructure to issue your own SSL Certificates to your customers.

## 4 ▶ Maintain YOUR Branding

Customers request SSL Certificates through a private labeled interface.

## 5 ▶ Provide SSL Certificates Immediately

Full RA control ensures rapid certificate issuance.

## 6 ▶ Industry leading prices for fully validated Certificates

Only Comodo provides fully validated Certificates with such speed and cost-effectiveness

## 7 ▶ Comodo Strength

Partnering with Comodo brings you an ever-expanding portfolio of Internet security and identity assurance solutions of the Comodo group of companies. With over 100 technical staff focused exclusively on innovation in these core areas, Comodo partners can be assured of an ongoing stream of profitable solutions in an expanding market.

- Comodo is the World's second largest and fastest growing Certification Authority
- 7,000 + Global partners
